Residents in Wisconsin
Juvenile Correctional Institutions
on June 30, 1987
With Five-Year Trends for 1983-1987

Five hundred and fifteen children, 480 boys and 35 girls, were in residence at Ethan Allen and Lincoln Hills Schools, Wisconsin's correctional institutions for juvenile offenders, on June 30, 1987. These figures represent a slight decrease (2.1 percent) from the 526 residents, 490 boys and 36 girls, reported on June 30, 1986. Boys and girls are committed to these institutions under provisions of the state's Children's Code which states that following an adjudication of delinquency a child may be committed to a facility operated by the Division of Corrections if (1) he or she has been found guilty of an act which would result in a sentence of at least six months if committed by an adult and (2) that circumstances indicate that treatment should be carried out in a secure, restrictive setting because of the potential for danger to the child and/or the community. Descriptive data about the boys and girls in residence on June 30, 1987 can be found in Tables 1 through 11, while Appendix Tables A and B present selected trend data for those in residence on June 30 in the years 1983 through 1987.

The number of boys in residence, which stood at 490 on June 30, 1986, dipped slightly (2.0 percent) to 480 on June 30, 1987. Just over three-fifths (61.1 percent) were at Ethan Allen School while the remainder (38.9 percent) were housed at Lincoln Hills School. Although the overall male juvenile resident population showed a slight decrease, the population at Ethan Allen School increased from 287 to 293 boys between June 30, 1986 and June 30, 1987, while the number in residence at Lincoln Hills dropped from 203 to 187 during the same time period; a decrease for that facility of 7.9 percent. Boys classified as new commitments made up about four-fifths (79.1 percent) of the population at Ethan Allen and almost nine-tenths (85.6 percent) at Lincoln Hills. Somewhat less than one-fifth (16.1 percent) of the residents at Ethan Allen and just over one-tenth (11.2 percent) of those at Lincoln Hills had been reinstitutionalized following the revocation of some type of supervision in the community; i.e., state or county aftercare supervision or TRY or WMHI program supervision. The remainder of the boys in both facilities had been returned to the institution to await the outcome of aftercare supervision revocation hearings.

Seven out of 10 (69.6 percent) of the boys in residence at Ethan Allen School on June 30, 1987 were committed from Milwaukee County, while an additional one-fourth (24.6 percent) were sent to the institutions from counties in the southern one-third of the state. The preponderance of boys from these areas of the state in the Ethan Allen resident population is largely due to the fact that this facility serves as the reception center for that area of the state, while Lincoln Hills School provides the same services for the central and northern sections of Wisconsin. Transfers between the two institutions may occur, as case needs and circumstances dictate. Just over three-fifths (61.0 percent) of the residents at Lincoln Hills were from counties in the upper two-thirds of the state, while about one-fourth (26.2 percent) had been committed from Milwaukee County. The average (median) age for all boys in residence on June 30, 1987 was 16.7 years, with boys at Ethan Allen being somewhat older (16.9 years) than those at Lincoln Hills, where the average (median) age was found to be 16.5 years. Just under one-half (47.9 percent) of the boys in residence were from Black family backgrounds, while those from White or White-Hispanic families made up somewhat more than two-fifths (45.2 percent) of the population. American Indians, including those with a Hispanic ethnic and cultural background, made up less than one-tenth (6.3 percent) of the population.

The major delinquent acts most often committed just prior to admission by boys in residence at Ethan Allen on June 30, 1987 were found to be theft (19.5 percent), battery (15.4 percent), and unarmed burglary (12.3 percent). Lincoln Hills residents had most often committed unarmed burglary (28.9 percent), auto theft (13.9 percent), and battery (10.3 percent) just prior to institutionalization. Evaluations carried out during the reception process indicate that a little more than one-tenth (13.9 percent) of the boys at Lincoln Hills and only 4.1 percent of those at Ethan Allen were free from problems relating to assaultiveness, sexual behavior, or the use of alcohol and/or other drugs. Almost three-fourths (73.8 percent) of the boys in residence at Ethan Allen and about three-fifths (59.3 percent) of those at Lincoln Hills were found to have problems with some type of assaultive behavior. Problems in dealing with sexual behavior were noted for almost one-fifth (19.7 percent) of the boys in residence at Lincoln Hills and just over one-tenth (11.6 percent) of those at Ethan Allen. The use of alcohol and/or other drugs was found to be a problem for slightly more than one-half (54.6 percent) of the boys at Ethan Allen and for slightly less than one-half (48.1 percent) of those at Lincoln Hills on June 30, 1987.

Lincoln Hills School, the only coeducational facility operated by Wisconsin's Division of Corrections, reported 35 girls in residence on June 30, 1987, one less than reported on the previous June 30. Eight out of 10 (80.0 percent) girls in residence on June 30, 1987 were classified as new commitments, 5 girls (14.2 percent) had been reinstitutionalized following the revocation of state juvenile aftercare supervision, and the remainder (5.8 percent) of the residents were girls who were returned to Lincoln Hills pending the outcome of some type of aftercare supervision revocation hearing. Girls from 16 of the state's 72 counties (22.2 percent) made up the resident population with slightly less than two-fifths (37.2 percent) having been committed from Milwaukee County. Commitments from four counties, Rock (3 cases) and Kenosha, Marinette, and Winnebago (2 cases) made up one-fourth (25.7 percent) of the population. It is interesting to note that the western and northern regions of the state, which contain exactly one-half of the state's 72 counties, were represented by only three girls, one each from LaCrosse, Douglas, and Oneida counties, in the June 30, 1987 resident population. White or White-Hispanic girls made up somewhat less than one-half (45.7 percent) of the population, four out of 10 (40.0 percent) were Black, and the remainder (14.3 percent) were classified as Native Americans. The average (median) age was found to be 16.3 years; the mean, 15.8 years.

Theft (20.0 percent), battery (17.1 percent), and armed robbery (11.3 percent) were the major delinquent acts most frequently committed just prior to admission by the girls in residence on June 30, 1987. Girls found to be free of problems relating to assaultiveness, the misuse of alcohol and/or other drugs, and sexual misbehaviors made up less than one-tenth (5.7 percent) of the population. About two-thirds (65.8 percent) of the residents were found to have problems with assaultive behavior, while sexual misbehavior was noted as an area of difficulty for just over one-third (34.3 percent) of the population. Seven out of 10 (68.6 percent) of the residents were found to have problems relating to the use of alcohol and/or other drugs.

Residents in Wisconsin
Adult Correctional Facilities
on June 30, 1987
With Five-Year Trends for 1983-1987

Wisconsin's Division of Corrections facilities for adult offenders were providing custody and treatment for a resident population of 5,836 persons, 5,532 males and 304 females, on June 30, 1987. These figures represent an increase of 10.1 percent over June 30, 1986 when 5,299 offenders were in residence. Nine out of 10 (96.9 percent) were housed in facilities operated by the Division of Corrections and 2.7 percent were in residence at the Wisconsin Resource Center, an institution operated by the Division of Care and Treatment Facilities. The remainder (0.4 percent) were housed under contractual agreements in the Dane County Ferris Center, federal prison facilities, and correctional institutions operated by the state of Minnesota. The decrease in the proportion of offenders housed in contractual facilities can be attributed to the opening of Columbia Correctional Institution, a maximum security facility, on May 14, 1986 as well as to the opening of the medium security Oshkosh Correctional Institution on September 10, 1986.

The bulk (99.1 percent) of the June 30, 1987 resident population was made up of offenders classified as serving sentences received from courts throughout the state; i.e., those classified in Table 1, Type of Admission, as new adult sentences, returns from parole or mandatory release with or without new sentences, etc. Forty-two residents, 0.9 percent of the population, are noted only in Table 1. These include 13 males held pending the completion of probation, parole, mandatory release, or special action early release revocation hearings, 23 males and one female serving alternative to revocation contracts, 2 males who returned voluntarily to the institution from mandatory release supervision, and 3 males serving sentences for jurisdictions other than Wisconsin. A variety of data about those in residence on June 30, 1987, including such information as offense, length of sentence, and county of commitment, can be found in Tables 2 through 15 while Tables A and B present selected trend data for the years 1983-1987.

The population in residence in correctional facilities for adult male offenders, which stood at 5,055 males on June 30, 1986, rose to 5,532 on June 30, 1987; an increase of 9.4 percent. This is the largest increase during the past five years with the smallest being the 1.7 percent increase noted between June 30, 1983 and June 30, 1984. Residents classified as new admissions, as in past years, made up four-fifths (80.3 percent) of the resident population. The average (median) length of sentence, which reached a five-year high in 1986, dropped slightly to 6.5 years for those in residence on June 30, 1987. Males in residence on June 30, 1987 were found to have an average (median) age of 28.1 years; a high for the five-year period. Two-fifths (39.9 percent) of those in residence on June 30, 1987 were committed to the institutions from Milwaukee County. Commitments from eight counties, Dane (386 cases), Kenosha (373 cases), Racine (345 cases), Rock (207 cases), Brown (158 cases), Waukesha (155 cases), LaCrosse (106 cases), and Winnebago (104 cases) made up one-third (33.4 percent) of the resident population. (See Table 6.) Just over one-half (54.8 percent) of the residents were born somewhere within the state of Wisconsin, two-fifths (40.4 percent) were born elsewhere within the United States, and less than one-twentieth (2.8 percent) were reported to have been born in foreign countries. (See Table 8.)

Just over one-third (35.6 percent) of the males in residence on June 30, 1987 had not been convicted of crimes that were considered to be assaultive, sex, or drug offenses; a slight increase over the five-year low of 35.0 percent reported on June 30, 1986. The proportion of males classified as having been involved to some extent in crimes considered to be drug offenses rose from 7.0 percent in 1986 to a high of 8.1 percent in 1987. Involvement in sex offenses, either alone or in combination with assaultive and/or drug offenses, was noted for almost one-fifth (19.1 percent) of the males in residence on June 30, 1987; a slight decrease from the previous year when 19.5 percent of the population was found to have such involvement. This is the first decrease noted in this category since 1984, when a low for the five-year period of 15.5 percent was recorded. Somewhat less than three-fifths (57.4 percent) of the males were found to have been involved in assaultive offenses, either alone or in combination with sex and/or drug offenses. This is a decrease from the previous year when the five-year high of 58.9 percent of the residents fell into this category.

On June 30, 1987, a total of 304 females were resident in Wisconsin's correctional facilities for adult offenders; a high for the period 1983-1987 and an increase of one-fourth (24.6 percent) over the previous high of 244 recorded on June 30, 1986. It is interesting to note that the resident population remained stable during the years 1983-1985, with the second-largest increase of almost one-fifth (17.9 percent) occurring between June 30, 1985 and June 30, 1986. Nine out of 10 (90.9 percent) of the females in residence on June 30, 1987 were classified as new admissions, a slight decrease from the five-year high of 95.2 percent reported on June 30, 1986. The proportion of females from non-White backgrounds, which has increased steadily since the low of 43.8 percent recorded in 1984, rose to over one-half (52.1 percent) in 1987. Females in residence on June 30, 1987 were found to have an average (median) age of 30.4 years; an increase of 2.4 years over the low of 28.0 years noted in 1984. Commitments from Milwaukee County made up two-fifths (40.3 percent) of the population on June 30, 1987; a high for the five-year period. The Milwaukee, Southern, and Southeastern Regions, a 19 county area covering the southern one-third of the state, were responsible for the commitment of three-fourths

(75.9 percent) of the females in residence on June 30, 1987. The Eastern (17 counties), Northern (17 counties), and Western (19 counties) Regions were responsible respectively for the commitment of 11.9, 6.9, and 5.3 percent of the residents. Twenty-six (36.1 percent) of the state's 72 counties had no representation in the resident population. A location somewhere in Wisconsin was reported as the place of birth for almost one-half (49.2 percent) of the females, almost two-fifths (39.9 percent) were born elsewhere in the United States, and the remainder (8.9 percent) were born either in an unknown location within or in a possession of the United States. (See Table 8.)

One-half ((50.8 percent) of the females in residence on June 30, 1987 were not incarcerated because of conviction of crimes regarded as assaultive, sex, or drug offenses. The proportion of females in this category has increased steadily since the five-year low of 42.2 percent reported in 1985. Females confined solely because of drug offenses made up one-tenth (10.9 percent) of the June 30, 1987 resident population; almost double the 5.8 percent reported in 1986. It should be noted that the proportion of females confined exclusively on drug charges has been increasing steadily since the low of 4.0 percent reported in 1984. Approximately one-third (32.4 percent) of the residents on June 30, 1987 were institutionalized solely because of the commission of some type of assaultive offense. These figures represent a low for the five-year period and continue a decrease from the high of almost one-half (45.5 percent) recorded in 1985.

1987 Calendar Year Summary of Population Movement

Information about the volume and movement of persons supervised by Wisconsin's Division of Corrections during calendar year 1987 in facilities for adult or juvenile offenders and in the community on probation, parole, mandatory release, special action early release, or juvenile aftercare status is summarized in this publication. Table 1 provides data about the types (new adult sentence, first release to adult parole, etc.) and volume of movements into and out of correctional facilities for adult offenders. Offenders housed under contractual agreements in federal correctional facilities, correctional institutions operated by the State of Minnesota, and in the Ferris Center, Dane County's Huber Law facility, are included in this table in the columns labeled "Contr Facil." The table also includes men resident at the Wisconsin Resource Center (WRC), an institution operated by the Division of Care and Treatment Facilities. Information about movements into and out of Ethan Allen and Lincoln Hills Schools, Wisconsin's two Division of Corrections-operated juvenile institutions, can be found in Table 2 while data about youth aids appears in Table 2-A. Community Services, i.e., probation and parole, information is displayed in Table 3 while 1987 absconder information is included in Table 4. Average daily populations for institution and community services cases for the years 1983-1987 can be found in Table A.

On December 31, 1987, the Division of Corrections was responsible for the supervision of 36,895 offenders including:

- 5,968 (16.2 percent) in correctional facilities for adults,
- 540 (1.5 percent) in juvenile correctional institutions,
- 26,576 (72.0 percent) under some type of supervision in the community, and
- 3,811 (10.3 percent) individuals on absconder status.

These figures represent an increase of 6.0 percent over January 1, 1987, when a total of 34,825 offenders were under supervision.

The total number of persons incarcerated in facilities for adult offenders rose from 5,552 at the start to 5,968 at the end of calendar year 1987; an increase of 7.5 percent. The population confined in facilities for adult males increased 7.5 percent from 5,281 at the beginning to 5,675 at the end of 1987 while facilities for adult female offenders reported an increase of 8.1 percent from 271 to 293 during the same time period. Juvenile institution resident populations rose from 492 at the start to 540 at the end of 1987; an increase of 9.8 percent. Community Services, probation and parole, caseloads increased 4.3 percent from 25,483 on January 1 to 26,576 on December 31, 1987. During the same time period the absconder population rose from 3,296 to 3,811; an increase of 15.6 percent.

1987	32,055	25,718	22,008	21,424	5	-	579	3,710	3,302	-	176	232	6,337	5,822	515

Table A presents average daily populations for Community Services and institutions for the calendar years 1983-1987. Information about absconder populations for the years 1983-1987 has been excluded from this table. Average daily populations were arrived at by computing averages for each month of the year, totaling the results, and dividing by twelve to arrive at calendar year figures.

The average daily population of offenders under the supervision of the Division of Corrections in either a field or institutional setting rose to a five-year high of 32,055 in 1987; an increase of 5.1 percent over 1986 when an average daily population of 30,501 was recorded and an increase of almost one-fifth (18.1 percent) over the low of 27,150 reported during calendar year 1983. The largest increase during the five-year period, 5.2 percent, occurred between 1983 and 1984 while the smallest, 3.3 percent, was noted between 1984 and 1985. Four-fifths (80.2 percent) of the offenders supervised by the Division of Corrections were in a field as opposed to institutional setting; a fact that held true during the five-year period.

Community supervision cases average daily populations rose steadily from 21,968 during calendar year 1983 to 25,718 during 1987; an increase of 17.1 percent. The average daily population for persons under some type of probation supervision, which was 18,680 in 1983, increased 17.8 percent to 22,008 in calendar year 1987. Parole average daily populations, which remained at about the same level in calendar years 1984 (3,525 cases) and 1985 (3,516 cases), increased 4.9 percent to 3,688 cases in 1986, and remained at about that level (3,710 cases) in 1987. The absence of juvenile probation cases after 1984 and the decrease in youthful offender cases on both probation and parole are due to 1) the 1978 revision of the Children's Code and a Department of Health and Social Services policy decision to no longer accept juvenile probation cases for supervision and 2) the repeal of the Youthful Offender Statute, effective July 1, 1978.

The overall institution average daily populations rose steadily reaching a five-year high of 6,337 in calendar year 1987; an increase of 22.3 percent over calendar year 1983 when an average daily population of 5,182 was reported. The smallest increase, 1.8 percent, occurred between 1983 and 1984; the largest, 8.2 percent, between 1986 and 1987. The average daily population of offenders incarcerated in facilities for adults rose from 4,716 in 1983 to 5,822 in 1987; an increase of 23.5 percent. The largest increase, 8.9 percent was noted between 1986 and 1987 while the smallest, 1.7 percent, took place between 1983-1984. Juvenile institution average daily populations reached a high of 531 in calendar year 1985, decreased (3.8 percent) to 511 in 1986 and remained at [illegible] level, 515 in 1987.

Calendar Year Summary of Movements
1987
Footnotes

Table 1. Facilities for Adults

/a Excludes 163 males: 8-psychiatric facilities; 2-medical hospitals; 19-court; 9-jail; 73-other jurisdictions; 3-other temporary absence; 30-escapee, at large; 21-escapee, apprehended.

Excludes 8 females: 1-court; 1-jail; 4-escapee, at large; 2-escapee, apprehended.

/b Excludes 52 status changes for males held pending revocation hearings; 2-no new sentence, adult probation violator; 17-no new sentence, adult parole violator; 22-no new sentence, adult mandatory release violator; 7-no new sentence, special action early release violator; 1-new sentence, adult parole violator; 2-new sentence, adult mandatory release violator; 1-new sentence, special action early release violator.

Excludes 2 status change for females held pending revocation hearings: 2-no new sentence, adult probation violator.

/c Excludes 461 status changes for males out on temporary absence: 8-first release, adult parole; 40-first release, adult mandatory release; 1 first release, direct discharge; 13-first release, discharge court order; 2-first release, death; 6-rerelease, adult mandatory release; 4-rerelease, direct discharge; 2-rerelease, discharge court order; 4-transfer to Reception Center; 259-transfer to adult facilities; 7-transfer to Northern centers; 33-transfer to Southern centers; 3-release after completion of adult mandatory release revocation hearing; 11-authorized absence; 68-unauthorized absence.

Excludes 46 status changes for females out on temporary absence: 3-first release, discharge court order; 26-transfer to adult facilities; 1-transfer to Southern centers; 2-authorized absence; 14-unauthorized absence.

Table 2. Juvenile Institutions

/a Excludes 21 juvenile males absent: 1-furlough; 9-trial foster home; 3-other jurisdictions; 8-over-stayed leave.

Excludes 6 juvenile females absent: 1-trial foster home; 5-over-stayed leave.

/b Excludes 148 status changes for juvenile males held pending revocation hearings: 128-return from state aftercare; 1-return from county aftercare; 13-return from TRY program; 6-return from WMHI program.

Excludes 18-status changes for juvenile females held pending revocation: 16-return from state aftercare; 2-return from TRY program.

/c Excludes 437-status changes for juvenile males out on temporary absence: 190-first release, state aftercare; 74-first release, county aftercare; 1-first release, TRY program; 1-first release, WMHI program; 10-first release, direct discharge; 11-first release, discharge court order; 39-rerelease, state aftercare; 6-rerelease, county aftercare; 2-rerelease, WMHI program; 5-rerelease, direct discharge; 3-rerelease, discharge court order; 4-release after completion of state aftercare revocation hearing; 14-transfer to juvenile institution; 27-authorized absence; 48-over-stayed leave; 2-unauthorized absence.

Excludes 45 status changes for juvenile females out on temporary absence: 15-first release, state aftercare; 4-first release, county 1-first, release direct discharge; 2-first release, discharge court 3-rereleased, state aftercare; 1-rerelease, county aftercare; 2-rerelease, direct discharge; 2-rerelease discharge court order; 1-authorized absence; 13-over stayed leave; 1-unauthorized absence.

KMCI - Kettle Moraine Correctional Institution
OSCI - Oshkosh Correctional Institution, opened September 10, 1986
OCI - Oakhill Correctional Institution
WCCS-North - Wisconsin Correctional Center System-Northern Sector. Created effective July 1, 1985, WCCS-North includes (1) Gordon, Black River, McNaughton, Sanger B. Powers, Winnebago, and Flambeau Centers from the Wisconsin Correctional Camp System, (2) St. Croix Center, previously a part of the Bureau of Community Corrections, and (3) the Drug Abuse Center, formerly the Corrections Drug and Alcohol Treatment Center.
WCCS-South - Wisconsin Correctional Center System-Southern Sector. Created effective July 1, 1985, includes Oregon and Thompson, both formerly units of the Wisconsin Correctional Camp System, and the Marshall E. Sherrer, Abode, St. John's and Women's Centers, all previously units within the Bureau of Community Corrections. Baker House was also included in the Southern Sector from July 1,1985 to December 26, 1985. Minimum Security Bunkhouse became part of WCCS-South on July 1, 1987.
Contract Facilities- Includes Minnesota correctional institutions (Stillwater, St.Cloud, and Oak Park Heights), Milwaukee County House of Corrections, Wisconsin county jails, Ferris Center (Dane County Huber Law Facility), and federal institutions in which Wisconsin inmates are housed under contract.
TCI - Taycheedah Correctional Institution

Security Level - Maximum security facilities include DCI, WCI, GBCI, CCI, and TCI. Medium security facilities include FLCI, KMCI, and OSCI. Minimum security facilities include OCI and North and South WCCS.
EAS Ethan Allen School
LHS - Lincoln Hills School
WMHI - Winnebago Mental Health Institute
W/O - Without
Prob. - Probation
Par. - Parole
M. R. - Mandatory Release
Y. O. - Youthful Offender

Residents in Wisconsin
Adult Correctional Facilities
on December 31, 1987/1

HIGHLIGHTS

- Males and females classified as new admissions, a category which includes those who received new sentences or who were classified as probation violators with or without new sentences, accounted for 80.1 and 93.2 percent of the resident populations. (See Table 1, pps. 1-2, 28-29)

- Males classified as White made up slightly more than one-half (53.7 percent) of the resident population whereas slightly more than two-fifths (44.0 percent) of the females in residence were reported to be White. (See Table 2, p. 3, p. 30)

- Unarmed burglary (22.8 percent), armed robbery (10.2 percent), and first degree sexual assault (7.9 percent) were the most frequently reported major offenses for males. The major offenses most often reported for females in residence were forgery (19.6 percent), theft (12.7 percent), and other drug offenses (10.0 percent). (See Table 3, pps. 4-6, 31-32)

- Males classified as assaultive or as assaultive and sex offenders made up more than one-half (55.3 percent) of the resident population. Just under one-half (48.1 percent) of the females in residence had not been convicted of crimes considered to be assaultive, sex, or drug offenses. (See Table 4, p. 7, p. 33)

- The average (mean) length of sentence for males in residence on December 31, 1987, was 10.3 years while the average (mean) sentence received by females was 6.3 years. (See Table 5, pp. 8-9, p. 34)

- About two-fifths of the males (39.4 percent) and females (44.0 percent) in residence were committed from Milwaukee County. One-fourth of the males (24.2 percent) and just over one-fourth of the females (27.2 percent) were committed from Dane, Kenosha, Racine, and Rock counties. (See Table 6, pp. 10-14, pp. 35-37)

- The average (mean) age for males was 30.2 years while females were reported to have an average (mean) age of 31.5 years. (See Table 7, p. 15, p. 38)

- Wisconsin was reported to be the place of birth for somewhat more than one-half (55.8 percent) of the males; a fact that was true for just over two-fifths (44.7 percent) of the females. (See Table 8, p. 16, p. 39)

- Eight out of ten males (80.2 percent) and three-fourths (75.6 percent) of the females were found to be free from physical, emotional, or developmental disabilities. (See Table 9, p. 17, p. 40)

- Slightly less than one-fifth (18.2 percent) of the males and five females (1.7 percent) were found to have a record of military service. (See Table 10, p. 18, p. 41)

- Approximately two-fifths (42.1 percent) of the males and one-half (51.2 percent) of the females had earned high school diplomas or GED or HED certificates. (See Table 11, p. 19, p. 42)

- ° Four out of ten males (41.1 percent) and almost one-half (48.5 percent) of the females had been institutionalized for less than one year. The average (mean) institution stay for males in residence on December 31, 1987, was 25.8 months; for females, 19.1 months. (See Table 12, p. 20, p. 43)

- ° One-third (33.8 percent) of the males in residence were classified as maximum or close security while almost two-fifths (38.0 percent) were classified as medium or medium out. Females with medium or medium out security classifications made up over one-third (36.1 percent) of the population. It should be noted that the presence of residents with maximum or medium security ratings in minimum security institutions is due to a time problem in reporting change in classification.
(See Table 13, p. 21, p. 44)

- ° Over one-half (55.7 percent) of the males were found to be moderately or seriously in need of treatment for problems relating to the use of alcohol. This was also true for four out of ten (40.6 percent) of the female resident population. Information was obtained from the inmate needs assessment system. (See Table 14, p. 22, p. 45)

- ° One-half (51.0 percent) of the males and almost three-fifths (58.8 percent) of the females in resident were at least moderately in need of treatment for drug problems. Information was obtained from the inmate needs assessment system. (See Table 15, p. 23, p. 46)

- ° Seven out of ten residents (74.5 percent of the males and 72.9 percent of the females) were found to be in need of treatment for problems relating to the use of alcohol and/or other drugs. Information was obtained from the inmate needs assessment system. (See Table 16, p. 24, p. 47)

- ° A need for treatment of problems relating to mental health was noted for just under two-fifths (37.8 percent) of the males and just under one-third (30.3 percent) of the females in residence. Information was obtained from the inmate needs assessment system. (See Table 17, p. 25, p. 48)

- ° Slightly more than one-half (52.6 percent) of the males and almost two-thirds (64.3 percent) of the females were found to be in need of some type of education programs. Information was obtained from the inmate needs assessment system. (See Table 18, p. 26, p. 49)

- ° Over three-fourths (78.6 percent) of the males and slightly over four-fifths (83.5 percent) of the females in residence were found to need some degree of vocational training. Information was obtained from the inmate needs assessment system. (See Table 19, p. 27, p. 50)

Prepared by:

Barbara Drown
Office of Policy, Planning and Budget
Division of Corrections
Department of Health and Social Services

/1 This publication, Statistical Bulletin C-57, Residents in Wisconsin Adult Correctional Facilities, December 31, 1987, is presented for the first time in a computer-generated format. The change was made so that information can be provided in a more timely fashion.

Appendix A

DCI	Dodge Correctional Institution. Reception Center for males. Maximum security facility.
WCI	Waupun Correctional Institution. Maximum security facility for males.
GBCI	Green Bay Correctional Institution. Maximum security facility for males.
CCI	Columbia Correctional Institution. Maximum security facility for males.
FLCI	Fox Lake Correctional Institution. Medium security facility for males.
KMCI	Kettle Moraine Correctional Institution. Medium security facility for males.
OSCI	Oshkosh Correctional Institution. Medium security facility for males.
OCI	Oakhill Correctional Institution. Minimum security security facility for males.
North-WCCS	Wisconsin Correctional Center System-Northern Sector. Minimum security facilities for males. The Northern Sector includes the Corrections Drug Abuse Correctional Center as well as the Black River, Flambeau, Gordon, McNaughton, Sanger B. Powers, St. Croix, and Winnebago Correctional Centers.
South-WCCS	Wisconsin Correctional Center System-Southern Sector. Minimum security facilities for males. The Southern Sector includes the Minimum Security Bunkhouse and the Oregon, Thompson, Marshall E. Sherrer, Abode, and St. John's Correctional Centers.
Contract	Includes facilities in which offenders are housed under contractual agreements while serving Wisconsin sentences. Wisconsin currently has contractual agreements with the federal government and with the state of Minnesota.
TCI	Taycheedah Correctional Institution. The Reception Center for female offenders. A maximum-medium security facility.
Women's Center	The Women's Correctional Center. A minimum security facility and a unit of the Wisconsin Correctional Center System-Southern Sector.
Ferris Center	The minimum security Dane County Huber Law Facility in in which women are housed under a contractual agreement.

M R	Mandatory Release.
SAR	Special Action Early Release.
GED	General Education Diploma
HED	High School Equivalency Diploma

Offenders Admitted to
Wisconsin Adult Correctional Institutions
Calendar Year 1987

- Seven out of 10 (70.3 percent) males and eight out of 10 (84.7 percent) females admitted to Wisconsin's correctional facilities for adults during calendar year 1987 were categorized as new admissions. This includes offenders who were not under any other type of supervision at the time of sentencing as well as probation violators who were incarcerated with or without additional sentences. (See Table 1.)

- Males admitted during 1987 had most often been convicted of and sentenced for unarmed burglary (27.1 percent), other drug offenses (7.7 percent), and theft (7.6 percent). Females were most frequently sentenced for theft (19.0 percent), forgery (16.7 percent), and other drug offenses (14.9 percent). (See Table 2.)

- The average (mean) length of sentence for all offenders admitted in 1987 was 67.8 months. Males received an average sentence of 69.5 months; females, 42.6 months. These computations do not include 29 males and two females admitted to serve life sentences. (See Table 3.)

- Slightly more than one-third (35.2 percent) of the males and females (34.5 percent) were committed from Milwaukee County. Three-tenths (29.4 percent) of the males were committed from Dane, Kenosha, Racine, Rock, and Brown Counties while two-fifths (40.2 percent) of the females were sentenced by courts in Dane, Kenosha, LaCrosse, Racine, Rock, and Waukesha Counties. (See Table 4.)

- Males convicted of unarmed burglary, other drug offenses, and theft received average (mean) sentences of 56.4, 40.3, and 46.7 months respectively. Females sentenced for theft, forgery, and other drug offenses received average (mean) terms of 37.5, 34.6, and 33.8 months. (See Table 5.)

- One-fourth (25.6 percent) of the males were classified solely as assaultive offenders; an additional one-tenth (12.1 percent) were also considered sex offenders; and 1.2 percent had also been involved in drug offenses. One-fifth (20.7 percent) of the females were classified as assaultive or assaultive sex offenders while just under one-fifth (17.2 percent) were categorized as drug offenders. (See Table 6.)

- Approximately one-fourth (24.0 percent) of the males admitted during 1987 were 21 years of age or younger. This was true for only about one-tenth (12.1 percent) of the females. The average (mean) age for all offenders was found to be 27.9 years. The average (mean) age for males was 27.8 years while females were slightly older with an average (mean) age of 29.6 years. (See Table 7.)

- Somewhat less than three-fifths (56.1 percent) of the males and just under one-half (48.3 percent) of the females were reported to be White. (See Table 8.)

- Two-thirds (66.0 percent) of the males and just over two-fifths (44.8 percent) of the females admitted during 1987 had never been married. (See Table 9.)

- Almost three-tenths (28.2 percent) of the males and just over one-fifth (22.4 percent) of the females had a record of two or more prior felony convictions. (See Table 10.)

- Previous institutionalizations in a Wisconsin correctional facility were noted for almost two-fifths (37.6 percent) of the males and one-fifth (21.3 percent) of the females. (See Table 11.)

- Over one-fourth (28.2 percent) of the males had a record of prior juvenile institution experience; a fact that was true for less than one-fifth (15.5 percent) of the females. (See Table 12.)

- Four out of 10 (40.3 percent) of the males and five out of 10 (48.8 percent) of the females had not earned a high school diploma. GED or HED certificates had been earned by one-third (33.7 percent) of the males and less than one-fifth (16.1 percent) of the females. (See Table 13.)

- The majority (81.2 percent) of the males and two-thirds (65.5 percent) of the females were found to be without physical, developmental, or emotional disabilities. (See Table 14.)

- A record of military service was noted for almost one-fifth (17.4 percent) of the males. Four females admitted during 1987 had also served in the military. (See Table 15.)

- Approximately one-half (48.1 percent) of the males and females (52.3 percent) received an initial custody classification of medium following completion of a security assessment. (See Table 16.)

- Placements in maximum, medium, and minimum security facilities occurred for 48.0, 25.6, and 21.6 percent of the males respectively after completion of assessment and evaluation. Placement in a maximum-medium facility occurred for eight out of 10 (81.6 percent) of the females while a minimum setting was noted for somewhat less than one-fifth (16.0 percent). (See Table 17.)

- Approximately one-third (36.1 percent) of the males and one-fifth (21.8 percent) of the females were found to be in serious need of treatment for problems relating to the use of alcohol. (See Table 18.)

- A serious need for treatment of problems arising from drug usage was noted for one-fifth (21.9 percent) of the males and one-third (32.8 percent) of the females admitted during 1987. (See Table 19.)

- One-fifth (20.0 percent of the males and over one-fourth (27.0 percent) of the females admitted during 1987 were not in need of treatment for drug and/or alcohol problems. (See Table 20.)

- About one-half (51.9 percent) of the males and three-fifths (60.9 percent) of the females were found to be in need of some type of educational programming. (See Table 21.)

- A need for some type of vocational training was noted for three-fourths (76.0 percent) of the males and four-fifths (81.6 percent) of the females admitted during 1987. (See Table 22.)

- Approximately one-fifth (18.1 percent) of the males and almost three-tenths (28.7 percent) of the females were found to be in at least moderate need of some type of treatment for problems relating to mental and/or emotional health. (See Table 23.)

- Placement in therapy (56.8 percent), drug programs (48.9 percent), and education programs (37.0 percent) were the programming recommendations most frequently made for males following the assessment and evaluation process. Program participation recommendations most frequently made for females were drug treatment (55.8 percent), some type of therapy program (55.2 percent), and work programs (35.6 percent). (See Table 24.)
